# School Science and Mathematics 1993 Index

### *Issue: Pages*

January: 1 - 54
February: 55 - 112
March:: 113 - 174
April: 175 - 232
May/June: 233 - 286
October: 287 -342
November: 343 - 398
December: 399 - 454

### *Authors*

| | | | | | |
|---|---|---|---|---|---|
| Appleton, Ken | 269 | Hoover, Hiram D. | 20 | Riggs, Iris M. | 257 |
| Baird, William E. | 175 | Hope, Jack A. | 306 | Rosenthal, Dorothy B. | 212 |
| Barry, Maurice | 35 | Kaiser, Mark J. | 369 | Roth, Wolff-Michael | 113, 237 |
| Bass, Daniel T. | 234 | Kennedy, Paul A. | 253 | Rowe, Mary Budd | 63 |
| Bidwell, James K. | 435 | Kidd, Dawn Hoyt | 418 | Rowsey, Robert E. | 175 |
| Blubaugh, William L. | 31 | Kim, Hy | 123 | Roychoudhury, Anita | 237 |
| Bockaire, Alex | 208 | Knupfer, Nancy Nelson | 360 | Schrock, Connie | 28 |
| Brasell, Heather M. | 63 | Lamb, Charles E. | 418 | Shemesh, Michal | 299 |
| Chiang-Soong, Betty | 24 | Lubinski, Cheryl A. | 198 | Shepardson, Daniel P. | 127, 264 |
| Clason, Robert | 344 | Madsen, Anne L. | 418 | Smith, C. Leland | 132 |
| Cochener, David | 158 | Masingila, Joanna O. | 38, 245 | Smith, Tommy | 175 |
| Cochener, Debbie | 158 | Mayes, Robert L. | 351 | Spector, Barbara S. | 9 |
| Derrington, Mary Lynne | 1 | McClurg, Patricia | 191 | Stensvold, Mark S. | 250, 242 |
| Dyche, Steven | 191 | Merkle, Dale G. | 355 | Stepans, Joseph | 191 |
| Easterday, Kenneth | 175, 234 | Mintz, Rachel | 76 | Stephens, Larry | 141 |
| Ebenezer, Jazlin V. | 96 | Moellwald, Francisco Egger | 245 | Stuessy, Carol L. | 55 |
| Eckstein, Shulamith | 299 | Morrow, Jean | 28 | Tamir, Pinchas | 136 |
| Ellis, James D. | 257 | Movshovitz-Hadar, Nitsa | 288, 408 | Toumasis, Charalampos | 428 |
| Ellis, Ronald S. | | Naizer, Gilbert L. | 321 | Treagust, David F. | 355 |
| Enochs, Larry G. | 257 | Nibbelink, William H. | 20 | Veath, M. Lois | 191 |
| Flores, Alfinio | 152 | O'Brien, Thomas | 203 | Volkmann, Mark J. | 217 |
| Frank, Martha | 344 | O'Shea, Thomas | 71 | Walker, Noojin | 188 |
| Funkhouser, Charles | 81 | Orion, Nir | 325 | Watson, Jane M. | 316 |
| Fyffe, Darrel W. | 23 | Peters, William | 344 | Wilson, John T. | 250, 424 |
| Gerig , Jean A. | 20 | Pizzini, Edward L. | 127 | Yager, Robert E. | 24 |
| Glidden, Peter Lochiel | 5 | Ramsey, John | 86 | Yager Robert E. | 145 |
| Griffiths, Alan K. | 35 | Rech, Janice | 141 | Zohar, Anat | 136 |
| Haigh, William | 92 | Reys, Barbara J. | 306 | Zoller, Uri | 96 |
| Hartzell, Judykay | 141 | Reys, Robert E. | 306 | Zollman, Alan | 132 |
| Herr, Norman Edward | 183 | | | | |

### *Titles*

A Comparative Study Between an American and a Republic of Korean Textbook Series' Coverage of Measurement and Geometry Content in First Through Eighth Grades 123
A Comparison of Alabama Secondary Science and Mathematics Teachers: Demographics and Perceived Needs 175
A Comparison of Student Perceptions of Science Activities Within Three Instructional Approaches 127
A Constructive Transition from Linear to Quadratic Functions 288
A Method of Designing Practical Examinations to Match What is Taught in Laboratory Activities 250
A Model for the Development and Implementation of Field Trips as an Integral Part of the Science Curriculum 325
A Survey of the Perceived Needs of Houston-Area Middle School Science Teachers Concerning STS Goals, Curricula, Inservice, and Related Content 86
An Activity-Based Approach to the Cosine Law 71
An Examination of the Problem-Solving Conceptualizations of Inservice Teachers 81
Comparisons of Mathematical Competencies and Attitudes of Elementary Education Majors with Established Norms of a General College Population 141
Computer Assisted Introduction to Mathematical Induction 31
Computerized Simulation as an Inquiry Tool 76

Concept to Application: Development of an Integrated Mathematics/Science Methods Course for Preservice Elementary Teachers 55
Demonstrating Proof by Contraposition and Contradiction Through Physical Analogs 369
Development of Children's Ideas on Motion: Impetus, the Straight-Down Belief and the Law of Support 299
Enrichment in the Mathematics and Science Curriculum in the Primary Grades 1
Fostering Professional Growth: A Criterion-Referenced Format for Student Teachers in Mathematics 132
Graphing Skills Among High School Physics Students 63
High School Students' Views About the Nature of Science 35
How Many Miles Per Hour Is That Fan Going? An Experiment to Implement Problem Solving in Grades 5-8 158
Images of Scientists: A Comparison of Biology and Liberal Studies Majors 212
Impacting the Science Attitudes of Minority High School Youth 400
Incorporating Critical Thinking Into a Regular High School Biology Curriculum 136
Investigating Polynomials and Systems of Equations with the Graphing Calculator 253
*Logo* and Transfer of Geometry Knowledge: Evaluating the Effects of Student Ability Grouping 360
Mathematical Induction: A Focus on the Conceptual Framework 408
Mathematics in the Mende Culture: Its General Implication for Mathematics Teaching 208
Mathematics Vocabulary: Performance of Residential Deaf Students 418
Mental Computation: A Snapshot of Second, Fifth and Seventh Grade Student Performance 306
More Effective Teaching in Mathematics 198
Order Out of Chaos: Restructuring Schooling to Reflect Society's Paradigm Shift 9
Problem-Centered Learning for the Integration of Mathematics and Science in a Constructivist Laboratory: A Case Study 113
Ptolemy's Theorem and Familiar Trigonometric Identities 435
Publisher-Based Science Activities of the 1980s and Thinking Skills 264
Pythagoras Meets Van Heile 152
Quasicrystals and the Penrose Patterns: A Geometric Activity with a Scientific Application 344
Questions and Conjectures Concerning Models, Misconceptions, and Spatial Ability 191
Readability Levels of the Science Textbooks Most Used in Secondary Schools 24
Science and Engineering Professors: Why Did They Choose Science as a Career? 321
Science-Technology-Society as Reform 145
Secondary Geometry: A Lack of Evolution 38
Student Knowledge of Health and Fitness Concepts and its Relation to Locus of Control 355
Summary of the Board of Directors' Meeting — SSMA 23
Teaching Fundamental Aspects of Science Toys 203
Teaching Logarithms Via Their History 428
The Current State of The Curriculum for Secondary Mathematics Education 351
The Development and Partial Validation of Microcomputer Utilization in Teaching Efficacy Beliefs Instrument in a Science Setting 257
The Distributive Property Undersold 316
The Effect of Print Size on Achievement in Mathematics Problem Solving 20
The No Change in Junior Secondary Students' Attitudes Toward Science in a Period of Curriculum Change: A Probe into the Case of British Columbia 96
The Relationship Between Advanced Placement and Honor Science Courses 183
To Walk or Run in the Rain: A Geometric Solution 217
Using Environmental Issues to Integrate Science and Mathematics 234
Using Polya to Foster a Classroom Environment for Real-World Problem Solving 245
Using the Computer to Solve Problems by the Guess-and-Test Method 92
Using the Secant Method to Approximate the Roots of an Equation 5
Using Theory to Guide Practice: Teaching Science From a Constructivist Perspective 269
Using Three Types of Outcomes to Design Laboratory Activities 422
Using Vee and Concept Maps in Collaborative Settings: Elementary Education Majors Construct Meaning in Physical Science Courses 237
Weather Data and Statistical Techniques 188
Wright or Wrong: Teaching the Order of Operations 28
